

## HALLET COVE PIPE REHABILITATION WORKS

Denso Protal 7200 being applied to the pipe.

### PROJECT DATA

Location	Hallet Cove, South Australia
Contractor	Hartech Pty Ltd
Client	APA Networks
Products	Denso Protal 7200
Date	March 2019
Ref No	B041

### PROJECT DETAILS

Denso approved Protal 7200 applicators, Hartech Pty Ltd was awarded the contract to carry out rehabilitation work on a section of pipe owned by APA Networks at Cove Rd in Hallet Cove, south of Adelaide. The project was part of on-going rehabilitation works around Adelaide.

The pipe was identified as having a corrosion issue and required rehabilitation of the original trilaminate coating which lasted nearly 25 years. A section of pipe also needed to be replaced due to isolated corrosion.

As part of the client's specifications, Denso's Protal 7200 was nominated as the product of choice as it could be applied by hand which resulted in a fast and environmentally friendly outcome.

Denso Australia is proud to be the preferred supplier on Ultra High Build Epoxy for this type of work.
